# Introduction

Thank you for purchasing an authentic Pearl® LED mirror. Crafted from high quality materials each component is carefully inspected before leaving the factory.

Please read the instructions carefully to prevent malfunction or damages.

## Before You Begin

Switch off the electrical supply at the mains before beginning.

Carefully read through the warnings and precautions on the rear on this instruction manual.

Inspect the product immediately upon receipt for transit damage, missing parts or manufacturing faults.

Handle the product with care and protect against knocks to all sides and edges of the glass.

Fixings supplied are for use in solid walls, hollow or stud walls will require specialist fixings available from your hardware supplier.

Make sure that you have all the tools you need to complete the job (See below).

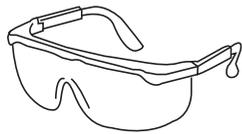

Ensure there are no hidden pipes or cables in the wall before drilling.

If drilling holes in ceramic tiles use a piece of masking tape on the tile to stop the drill bit from slipping.

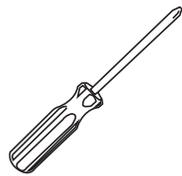

## Tools Required

Electric Drill

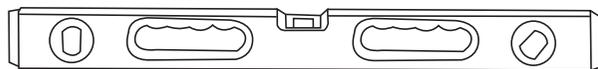

Safety Glasses

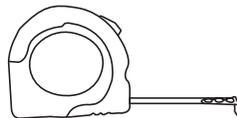

Philips Screwdriver

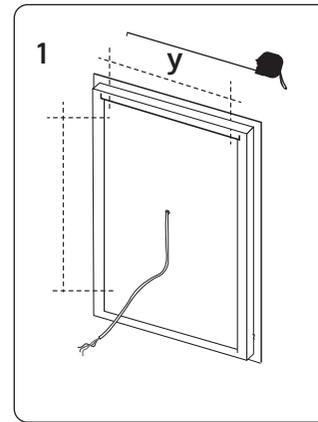

Pencil

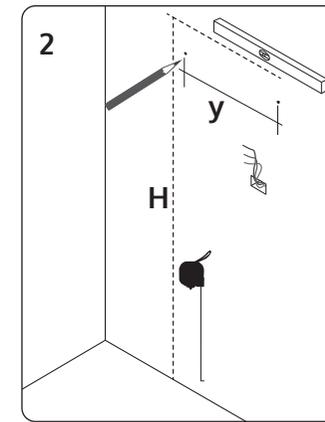

Level

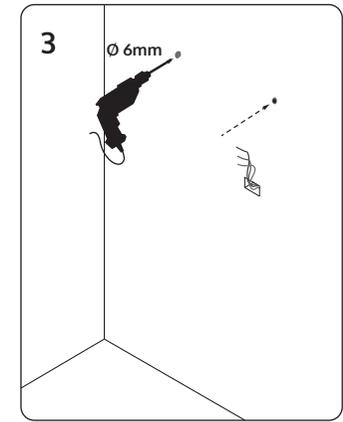

Tape Measure

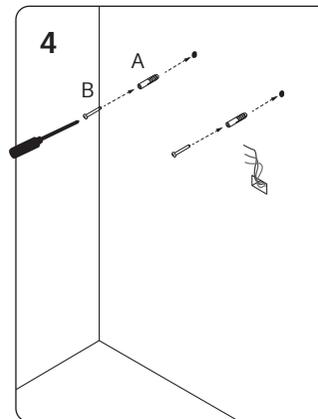

Measure the distance between the two ends, this mirror can be hung horizontal or vertical.

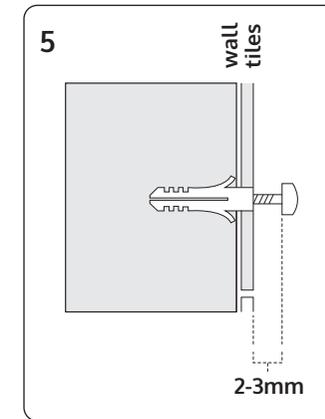

Using a pencil and a level, mark the desired position on the wall.

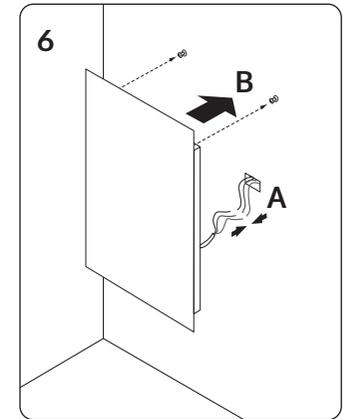

Drill the holes for wall plugs.

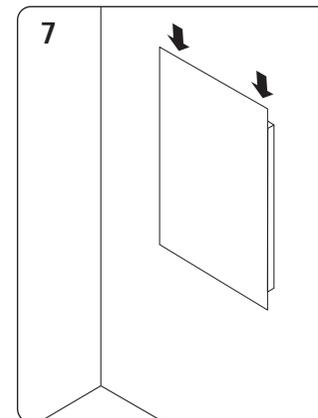

A: Insert wall plugs  
B: Insert screws

Leave a 2-3mm gap between the screwhead and wall.

A: Connect the wires properly to their corresponding colour.  
B: Lift the mirror above the screws.

Slide the mirror down onto the screws, check if secure.

## How to Use

To turn the LED light off and on simply tap on the square located on the lower front of the mirror.

The LED lights can be adjusted between three colour temperatures, 3000k, 4000k and 6000k. To toggle between them, press and hold the on/off button.

## Maintenance

Clean using a soft dry cloth only when turned off. Never use cleaning agents or abrasive materials. Do not allow moisture to come into contact with the lamps.
